(\$400 for single reservation)

credit card to Poseidon Dive Adventures

Important:

*Deposit/payments are non-refundable
unless someone takes your place*

Travel insurance recommended

Magic Island is a boutique dive resort with only 10 individual cottages and a dive center nestled between palm trees on the west coast of Cebu Island. It caters to divers and people who want to learn. The resort sports a restaurant/bar (meals are included), a small swimming pool with sun beds, a spa and two terraces. It has received the 2017 TripAdvisor Certificate of Excellence

The PADI 5 Star dive center is located right on the sea front facing the amazing house reef, available 24/7. Several dozen dive sites pepper the shore; the resort's 3 boats are traditional Filipino boats known as "Banka Boats" that are long and narrow with bamboo outriggers to stabilize them in the ocean. The tide is usually high enough that the boats can pull up to shore.

Mandarin fish live about 120 feet from shore in only 12-15 feet of water. Every dusk (except the full moon) these tiny fish rise out of the corals for mating—so instantaneous that you will be thrilled to actually get the picture!

Fluoro Diving is a very different way to dive at night. You use a special UV light torch and a special lens over your mask that allows you to see the fluorescent colors emitted by the fish and coral under UV light. The reef turns into a spectrum of colors. Or try a Blackout Dive at night in the open ocean in about 10 feet of water to watch for whatever might swim into view.

Philippine diving offers everything—big, little, unusual and our favorite NUDI BRANCHES! Water temperatures range from 80-84F, probably about 82F in October.
